## DETAILED ACTION

### *Election/Restrictions*

This application contains claims directed to the following patentably distinct species of the claimed invention:

a). Species I: claims 1-4,7-9 & 20, drawn to a deposition and gettering performed simultaneously.

b). Species II: claims 5,6 & 10-15, drawn to a deposition, gettering performed simultaneously, and LPCVD layer includes Silicon & Nitride.

c). Species III: claims 16 & 17, drawn to a metallic impurity gettering.

d). Species IV: claims 18 & 19, drawn to a non-single crystal semiconductor or silicon.

e). Species V: claims 21-25,27 & 28, drawn to a deposition followed by heat treatment for gettering.

f). Species VI: claims 26,29 & 30-32, drawn to a deposition followed by heat treatment for gettering and layer includes Silicon & Nitride.

g). Species VII: claims 44-59, drawn to a crystallizing the amorphous silicon.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is

Art Unit: 2813

allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yennhu B. Huynh whose telephone number is 703-308-6110. The examiner can normally be reached on M-F 8.00AM-4.30PM.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
